## MISSION STATEMENT:

To always be available to supply the latest technology machinery, equipment and tooling for fastener and cold formed parts manufacturers, becoming the best source for solutions to our Customer's needs and expectations.

## QUALITY POLICY:

Seeking always to meet the customers' needs and requirements, continuously improving our Quality Management System on:

- Customer satisfaction
- Quality Management System requirements
- Team's satisfaction

## COMPANY HISTORY:

SouthWind International was founded in 1995 to operate all over the South American market, working as a sales agent of foreign companies to supply fastener machines, auxiliary equipment, process monitors, sorting machines, gages and complete range of fastener tooling. The company headquarters is located in Sao Paulo-Brazil, with sales force covering the main regions of fastener industry in Brazil and Argentina. SouthWind had started importing

and distributing standard and special heading and threading tools for fastener manufacturing in 1997 and then quickly became recognized as a high-quality product and service supplier in Brazil, Argentina and Chile. SouthWind is the only source for the fastener industry in South America that can supply the complete line of machinery, equipment and tools for the whole manufacturing process of fasteners and cold formed parts, through the wide range of its represented companies, from wire drawing, cold and hot forging, threading, inspection and sorting, up to the packing of the final product. The company has started a new subsidiary in the USA in 2015, located in FL, to service fastener manufacturers in Mexico, US and Canada. SouthWind International USA is dedicated to supply cold forming and threading tools, machinery and auxiliary equipment to the fastener industry in North America.

SouthWind International focuses on total customer satisfaction and thanks to the premium service and the unique technical knowledge of its team, it has assured to the company a strong and constant growing market share in South America and now keeps working hard to reach the same reputation in North America in the next few years.
